Re: Handicapped Access Voting equipment

The set up and L&A testing for the handicapped voting equipment was observed by 2 Republican Party Observers before the special election started. Testing appeared to demonstrate that the equipment worked properly.

On Feb 14 -- Election Day -- at the voter service center in the Spokane Valley the equipment did not work when a voter tried to use it.

Was this incident checked out and the cause of the problem found?

Did the company that supplied the equipment have instructions for diagnosing the problem?

We know that it worked during the testing process -- so it should have worked on Election Day.

Thank you for attending to this matter.
