

# HOST

## HOMELESS OUTREACH STABILIZATION & TRANSITION

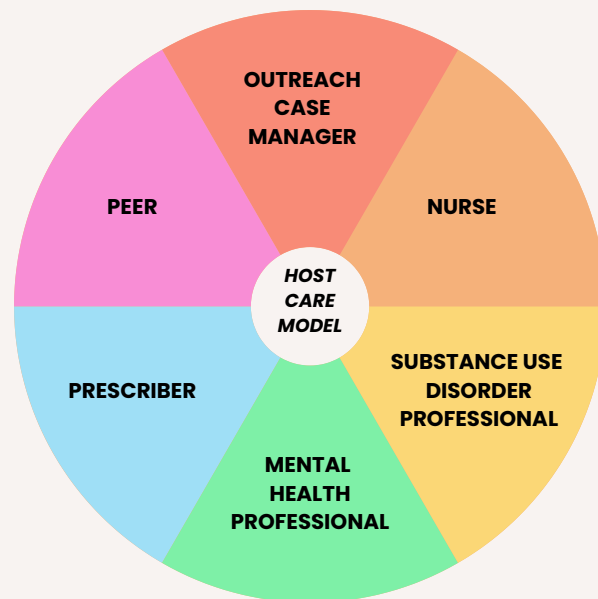

### What is HOST?

The Homeless Outreach Stabilization and Transition (HOST) program provides critical, outreach-based treatment services to individuals with persistent behavioral health challenges including substance use disorder (SUD) in addition to homelessness. HOST is a multi-disciplinary team of health, substance use disorder, mental health, medical and peer providers.

HOST prioritizes services to those who are highly vulnerable, lack service connections or other support and who are unwilling or unable to engage in traditional service models.

### GOALS

- Reach people who experience barriers to receiving conventional physical and behavioral health services.
- HOST is not linkage to services, rather the goal is to bring mental health and substance use services to them.
- HOST is highly tailored to the individual and services are provided through a comprehensive team approach.

**HOST eligibility means that an individual has a behavioral health challenge, which can include SUD with or without co-occurring mental illness, that is untreated, under-treated or undiagnosed, and is experiencing literal or chronic homelessness.**
