Origin Forensics LLC presented their finding in the Holyk/Bodman case.

**Highlights:**

- No damage to the bike, no impact from the deputy's vehicle.
- Deputies vehicle shows many dings and dents from being an "in service vehicle" none consistent with hitting the bicycle.
- Injuries Holyk sustained are consistent with a head to pavement contact. His arm shows a pavement abrasion consistent with how he is laying in the investigation photos.

- Holyk was down ~1 second by the time deputy Bodman arrived in the crosswalk.
- Deputy Bodman started to break ~100 feet before the crosswalk
- Deputy Bodman's vehicle did not make contact with Holyk or his bicycle.
- Had the Deputies vehicle (~48 mph in the crosswalk/ 5,000 lbs) and Holyk &/or bicycle (~200 lbs) made contact he would not have been atop his bike in the crosswalk, as photographed.
- Origin Forensics findings were in line or similar to those of the WSP, SPD, & Grant Fredericks investigations.
